

JEFF-COI-SMART is a web-based application that enables users to quickly and conveniently submit Jefferson's required Financial Conflicts of Interest Disclosure Forms. COI-SMART maintains electronic copies of all Conflict of Interest submissions, and, for your convenience, COI-SMART will auto-populate previously submitted information to minimize the need for re-entry of the same information year after year. Most importantly, COI-SMART's security controls ensure that the information you disclose is maintained securely and privately.

The new Jeff-COI-Smart system provides a viable means through which to manage emerging complexities associated with Jefferson's rapid growth in research and innovation. Our team of Conflicts of Interest experts will utilize the Jeff-COI-Smart system to support the advancement of innovation while protecting the integrity of Jefferson's research processes and activities.
