Match Day 2016

Joined by family, friends, faculty and staff, 247 graduating SKMC seniors learned their professional fates on March 18—otherwise known as Match Day 2016. The students have spent the past several months preparing for this event, applying to countless programs and traveling across the country for interviews. As they discovered where they will continue their medical training after commencement, they were assured all their hard work paid off. The specialty with the highest number of matches this year was internal medicine, totaling 57 students—or 23 percent of the class.

**Congratulations to the
Class of 2016!**

*Data as of March 18, 2016.
